SCL-PK3/M

CineAlta 4K PL mount lens pack x3 (metric)

Professional quality prime lenses for PMW-F55 and PMW-F5

The SCL-PK3/M lens pack is a range of three high quality, cost effective PL mount prime lenses that work seamlessly with the PMW-F55, PMW-F5 and other CineAlta camcorders. Each lens is certified for 4K capture, while minimizing geometric distortion, vignetting, and breathing.

Pack of 20mm, 25mm and 135mm lenses with metric calibrations

The set includes 3 lenses with focal lengths of 20mm, 25mm and 135mm. For easy lens changes, all lenses have a consistent design, with metal casings and an aperture of T2. A 9-blade iris delivers a beautiful bokeh (the out-of-focus area of an image) and the focus ring rotates 240°.
